Fourth Hanseatic India Colloquium: Healthcare, Biotechnology and Pharmaceutical Sciences

**Conference Room of Allianz Germany AG
Sprinkenhof, 7th Floor, Burchardstrasse 8, 20095 Hamburg
Friday, October 30, 2009**

After the overwhelming response received for the first, second and the third Hanseatic India Colloquium organised in Hamburg since 2006, the organising committee has decided that the fourth Hanseatic India Colloquium with a focus on Healthcare, Biotechnology and Pharmaceutical Sciences should again be held in Hamburg. This event will be a part of India Week Celebrations in Hamburg taking place during October 23 - Nov. 01, 2009.

The Hanseatic India Colloquium will precede a major European Biotech event, the BIO-Europe 2009 (<http://www.ebdgroup.com/bioeurope/>) which is scheduled to take place in Vienna, Austria, during November 2-4, 2009.

Like its predecessors, the Fourth Hanseatic India Colloquium will be planned to show-case the progress that India has made in the field of life sciences and to provide a platform for an effective networking between Indian and German/European companies. The emphasis will be to catalyse an effective two way co-operation in the area of pharmaceuticals, biotechnology and healthcare. Topics like biopharmaceuticals, cooperation in R & D and in drug development, bioinformatics, and a discussion on IP right protection will be included.

German and Indian decision-makers from the biotechnology, pharmaceutical and healthcare sectors will be brought together, offering excellent networking opportunities. Collaboration opportunities developed in prior Hanseatic India Conference have already produced many highly successful business partnerships. This time too several cooperation proposals are expected to be discussed and taken forward.

It is a pleasure to announce at this stage that two special lectures will be delivered by two distinguished speakers, Dr. Jens Würthner, Director, Translational Research Pharmacology & Discovery Medicine of Glaxo Smith & Kline, Stevenage, UK and Dr. S. Bialojan Director & Head, European Life Science Centre, Ernst & Young AG, Mannheim, Germany.

An evening reception coupled with networking will be organised on Friday through the courtesy of HWF Hamburg Business Development Corporation and NORGENTA North German Life Science Agency.
